4mm material thickness.

Options

- Brass
- 304 Grade stainless steel
- Bright polish finish
- Bespoke sizing
- Full installation service

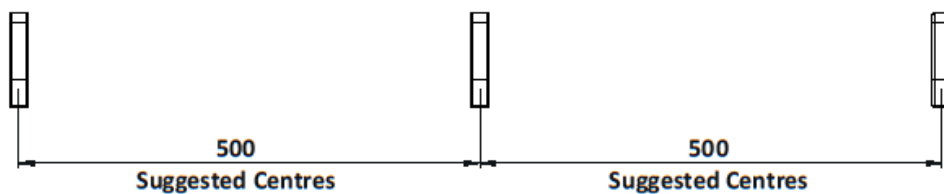

102-102 Anti-Skate Blade Installation

Installation

1. Use a 12inch angle grinder to form a slot
2. Remove dust and debris caused by drilling.
3. If using ready mixed polyester resin apply a sufficient amount to half fill the slot, so the hole is completely filled once the blade is inserted.
4. Push the blade into the slot firmly ensuring an edge seal around the entire blade.
5. Allow a few minutes for the resin to set
